## Reviews

I am continually impressed with Shaun's ability to write music with such depth and emotion. His music is evocative and inspiring encompassing a broad range of styles. He is a gifted composer who will make a mark on the music industry to come.

Shaun Paul's music is universally appealing. His unique ability to combine beautifully composed melodies with lush orchestral arrangements creates a full listening experience. His talent ranks equally with some of today's best composers.

Each time I listen to "For Ever" the delicate yet powerful fabric of your notes literally resonate within my heart and flow through my body, as the story gently unfolds. I somehow feel transcended to a place where Ever lives through your song each time I hear the piece. Your composition is so poignantly beautiful as if you were divinely led.

I felt like I was soaring like an eagle.

I'm listening to "A Walk through Time". I did not read your intros before listening, but immediately felt like I was in several of my favorite "unseen" movies. I did not realize that you had such a talent for cinematic and soulful melodies. I could easily feel and visualize many scenes and dramatic episodes just listening to yours. For me the cello truly 'speaks' a language from the heart and soul that words cannot speak. I believe the music can bring such life to a story. Without the right sounds, it can be so dry.

Move over John Williams, and the rest, here comes Shaun Paul!

Blessings from a very satisfied customer...

Your music took me to the depths of the ocean – through lovely green meadows with flowers – and to the tops of mountains with birds singing in tall evergreen trees. So much beauty in one lovely hour of relaxation and exhilaration. Your range of knowledge of your instrument and that you put your heart and soul into your music is obvious and much appreciated.

**-Valerie, Washington**

Just got home after having bought your CD and just when you think a song couldn't be more beautiful the next track begins. Every song is beautiful, romantic... words just can't explain. I will be back in two weeks to purchase another CD. You are very talented and I am sure the world is richer for you being in it and sharing your gift with others. You truly must have romance in your heart to create works so beautiful.
